

Play With your imagination

TOY FUN

About Us

"Aha moments -- those are every teacher's goal. We love them too. Our hands-on learning products are designed to read kids and help them build deep knowledge. Active, engaged learning through hands-on experiences is critical to the learning process. Our products try to take the abstract and make it concrete. We strive to fire up imagination and spark a lasting insight in the child's mind.

At Vishal Marketing, we've had only one mission for over 25 years: to create high-quality, effective, hands-on educational toys and products that help our children realize their full potential.

Our Vision :

Vishal Marketing toys are based on 3 principles : Live, learn and play

Play :

We, at Vishal Marketing, constantly strive to make learning playful, exploratory and challenging for kids. All our products stimulate young children to play. As a result, they develop specific, important skills in a natural way and learn through play.

Learn :

We believe that every child deserves the best possible education. That is, education with a focus on individual talents, personal results and achievements. Our toys form a solid base for learning. They stimulate the development of a child through active hands-on learning. Our emphasis on play-based learning incorporates play-based teaching. We provide clear guidelines for learning and instructions to effectively stimulate the learning experience for a child. Our products promote distinct and clear learning goals and skills which are stated in this catalogue.

Live :

We help young children to understand the ways of our world. Educational goals are strengthened by associating with everyday situations. Our products use daily life experiences to encourage and reinforce key concepts. A solid base for development!

Matching Skills

These toys help children improve their auditory and visual memory skills. These games provide a strong, concrete representation of the corresponding words to strengthen the connection and build vocabulary.

Imagination

These theme based toy promote pretend play in kids. They involve a highly entertaining series of games which uses a multisensory, interactive approach that encourages the child to participate and learn.

Problem Solving Skills

These games focus on immensely enhancing the cognitive skills (i.e., analysis, calculation, planning and prioritization) required to make sound decisions and solve problems beyond the confines of toys and games.

Word Skills

These games cover a range of academic levels so that children can use them for learning, reviewing, and mastering their vocabulary over several years. Featuring various topics, such as early reading, math facts, and basic skills, these games can help students strengthen the skills needed for high academic achievement.

Number Skills

These games enhance foundational math skills while being creative and learning about numbers. Watch your child gain confidence and independence while working with numbers! These products integrate math with art, logic, writing, creativity, relaxation, research and science.

Hearing Skills

These toys promote auditory development and music appreciation. The benefits of music education go beyond just fun. Children become familiar with basic musical concepts like rhythm, melody, and dynamics. Studies show increased language development, improved test scores, better spatial skills, and increased IQ.

First Skills

One of the most valuable things a teacher can do is to help students prepare for lifelong learning. Improved learning skills — concentrating, reading and listening, remembering, using time, and more — are immediately useful and will continue paying dividends for a long time.

Hand-Eye Co-ordination

These games serve as a practice for hand-eye coordination and dexterity. Players build upon what they learn, even while playing as a group. Only a few minutes of play can strengthen hand-eye coordination in a captivating way. This coordination between the eyes and hands also impacts handwriting!

Creativity

Research shows that creativity is an essential human trait that requires nurturing to allow it to flourish. Creativity is linked with problem solving, innovation, critical thinking, empathy and greater levels of job satisfaction in adults. These games allow you child's imagination to run wild as they embrace their creative side.

Social Skills

Encourages children to work together to build creations. Great family/friends bonding activity.
